Formly Interview 1 Field Notes

Abigail Galarza | Sprint 3

Participant ID: X (Abigail's interview, separate from the team Interview X). Interview date: not recorded in the source notes.

Evidence source: Firsthand participant interview (Tier 1). Behavior/opinion labels refer to the kind of statement, not the evidence tier.

1. Screen (1 minute)

Interviewer: What do you currently use to help you check or improve your exercise form?

X: My gym's app on the machines using the QR codes when I don't know how to use a machine or how to do the proper form.

Tag: BEHAVIOR - reports using QR codes on gym machines.

2. Last-time story (4 minutes)

Interviewer: Can you walk me through the last time you checked whether you were doing an exercise correctly?

X: I look in the mirror and hit my cues, but if there is no mirror, I try and hyper-focus on the muscle I'm trying to hit.

Tag: BEHAVIOR - describes a usual practice, not a specific last-time event.

3. Alternatives (3 minutes)

Interviewer: What other methods have you tried to check your form, and why did you stop using them?

X: I stopped relying on YouTube videos because a lot of people contradict themselves, so I've been confused many times trying to differentiate what's right from wrong because social media has a lot of different opinions.

Tag: BEHAVIOR - stopped relying on YouTube. OPINION - views online advice as contradictory/confusing.

4. Switching story (4 minutes)

Interviewer: What made you start using the QR codes on the machines? Are you still using it? If not, why?

X: I started using the QR codes because they provide instructions from the manufacturer, so I assumed they were correct. Though I slowly stopped using them, they still helped me in the beginning.

Tag: BEHAVIOR - started and gradually stopped using QR codes. OPINION - assumed manufacturer instructions were correct and found them helpful.

5. Money and time (2 minutes)

Interviewer: How much time or money have you actually spent on checking or improving your form recently?

X: I've spent around $800 on personal trainers, trying out different trainers to see what worked best for me and helped improve my form. Eventually, I decided to go solo and work on improving my form on my own.

Tag: BEHAVIOR - reports ~$800 spent, trying different trainers, then training independently. Time period not specified.

6. Close (1 minute)

Interviewer: Is there someone you know who has tried a similar method or something different?

X: Yes, my friend paid $700 for just one personal training session because he wants to compete at a more serious level. I think an app or something more efficient and affordable would be perfect for people who want to improve their form without spending so much money.

Tag: SECONDHAND REPORT - friend's $700 session is unverified, not participant's own behavior. OPINION - an affordable app would be useful.
